Re: Request for Information Pursuant to Section 104 of CERCLA for HPM Plant #1  
Site in Mt. Gilead, Ohio

Dear Mr. Linder:

This letter seeks your cooperation in providing information and documents relating to abandoned hazardous substances and hazardous wastes which currently exist in an uncontrolled manner at the HPM Plant #1 Superfund Site in Mt. Gilead, Ohio ("Site"). A Superfund site is a site contaminated with high levels of hazardous substances that may present a threat to human health or the environment.

We encourage you to give this matter immediate attention and request that you provide a complete and truthful response to this Information Request and attached questions (Attachment B) within **fourteen (14)** days of your receipt of this letter.

The United States Environmental Protection Agency ("U.S. EPA") is investigating the release or threat of release of hazardous substances, pollutants, or contaminants at the Site. U.S. EPA is seeking to obtain information concerning the generation, storage, treatment, transportation, and methods used to dispose of such substances that have been, or threaten to be, released from the Site. In addition, U.S. EPA will identify activities, materials, and parties that contributed to contamination at the Site. U.S. EPA believes that you might have information which may assist the Agency in its investigation of the Site.

The HPM Plant #1 Site is comprised of a facility located on approximately 5 acres, and includes a building which contains abandoned hazardous wastes and substances generated by TIS/HPM. TIS/HPM conducted machining, fabrication, welding, heat treating, and chrome plating, among other manufacturing processes. The wastes left behind include used oils, oil products, contaminated coolants, flammable and corrosive liquids, paint-related materials, and other unknown substances. These wastes can be found throughout the site in drums, tanks, floor pits/drains, and various smaller

containers. The conditions at the Site pose the risks of potential exposure to humans, the threat of release, and the threat of fire or explosion.

#### Description of Legal Authority

The federal "Superfund" law (the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. §9601, et seq., commonly referred to as "CERCLA" and "Superfund") gives U.S. EPA the authority to, among other things: (1) assess contaminated sites, (2) determine the threats to human health and the environment posed by each site, and (3) clean up those sites in the order of the relative threats posed by each.

#### Information Request

Under Section 104(e)(2) of CERCLA, 42 U.S.C. §9604(e)(2), U.S. EPA has broad information gathering authority which allows U.S. EPA to require persons to furnish information or documents relating to:

- (A) The identification, nature, and quantity of materials which have been or are generated, treated, stored, or disposed of at a vessel or facility or transported to a vessel or facility.
- (B) The nature or extent of a release or threatened release of a hazardous substance or pollutant or contaminant at or from a vessel or facility.
- (C) Information relating to the ability of a person to pay for or to perform a cleanup.

While U.S. EPA seeks your cooperation in this investigation, compliance with the Information Request is required by law. Please note that false, fictitious, or fraudulent statements or representations may subject you to civil or criminal penalties under federal law.

Some of the information U.S. EPA is requesting may be considered by you to be confidential. Please be aware that you may not withhold the information upon that basis. If you wish U.S. EPA to treat the information confidentially, you must advise U.S. EPA of that fact by following the procedures outlined in Attachment A, including the requirement for supporting your claim for confidentiality.

If you have information about other parties who may have information which may assist the Agency in its investigation of the Site or may be responsible for the contamination at the Site, that information should be submitted within the time frame noted above.

This Information Request is not subject to the approval requirements of the Paperwork Reduction Act of 1995, 44 U.S.C. §3501 et seq.

Instructions on how to respond to the questions in Attachment B to this document are described in Attachment A. Your response to this Information Request should be mailed to:

Debora Haidar  
U.S. EPA  
25089 Center Ridge Rd.  
Westlake, Ohio 44145.

If you have additional questions about the history of the Site, the nature of the environmental conditions at the Site, or the status of cleanup activities, please contact Brad Stimple, On-Scene Coordinator, at (440) 250-1717 . Other questions may be directed to Nola Hicks of the U.S. EPA Office of Regional Counsel, at (312) 886-7949.

We appreciate and look forward to your prompt response to this Information Request.

Sincerely,

A handwritten signature in cursive script, appearing to read "R. delRosario".

Confidential portions of otherwise nonconfidential documents should be clearly identified. You should indicate a date, if any, after which the information need no longer be treated as confidential. Please submit your response so that all non-confidential information, including any redacted versions of documents, is in one envelope and all materials for which you desire confidential treatment are in another envelope.

All confidentiality claims are subject to U.S. EPA verification. It is important that you satisfactorily show that you have taken reasonable measures to protect the confidentiality of the information and that you intend to continue to do so, and that it is not and has not been obtainable by legitimate means without your consent.
